PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science student at MIT Academy of Engineering, Pune (CGPA 8.34/10), with a strong foundation in Data Structures & Algorithms (290+ problems on CodeChef, 100+ on LeetCode, in C++). Built an offline AI assistant using local LLMs, RAG and network-isolated Docker containers, and an Arduino-based game controller. Hands-on exposure to Linux, Git and AWS through internships and projects. Aspiring to build a career in Cloud Computing, DevOps and looking for internship opportunities to deepen these skills.

KEY EXPERTISE

C++ | Data Structures & Algorithms | Object-Oriented Programming | SQL | DBMS | Python | Problem Solving | Creative Problem Solving

EDUCATION

MIT Academy of Engineering, Pune 2024 - 2028

B.Tech. - Computer Engineering | CGPA: **8.34** / **10**

Vatsalabai ramchandra divate jr college , vita, VITA 2023

12th | MSBSHSE | Percentage: **73.67** / **100**

Bharatmata vidhyalay mayani,satara, Mayani 2021

10th | MSBSHSE | Percentage: **89.20** / **100**

INTERNSHIPS

Edunet Foundation | IT / Computers - Software 06 Jun, 2026 - 20 Jul, 2026

AI/ML & Cloud Computing Intern

Completed an AI/ML & Cloud Computing internship through IBM SkillsBuild and Edunet Foundation. Worked on hands-on projects in Artificial Intelligence, Machine Learning and Cloud Computing, using cloud-based tools and industry workflows under mentorship. Earned IBM digital badges and certifications.

Cisco Networking Academy | IT / Computers - Software 01 Jun, 2025 - 01 Aug, 2025

Virtual Intern

Completed a 6-week Networking & Cybersecurity internship. Learned networking fundamentals, cybersecurity concepts and enterprise systems. Configured network components, explored security protocols, and studied threat mitigation, access control and infrastructure security practices.

PROJECTS

Sovereign On-Premise AI Workbench

Key Skills: Python | Streamlit | Ollama | ChromaDB | RAG | Docker | Tesseract OCR | LLMs

Project Link: https://github.com/shindesiddhant-415/sovereign-ai-workbench

Built a fully offline, self-hosted AI assistant for confidential industrial workflows, developed for Smart India Hackathon Problem Statement 26117 (MRPL). The system runs with no network connectivity. A task router sends each request to a specialized local LLM (reasoning or code generation) served through Ollama. A RAG pipeline using ChromaDB grounds responses in internal SOPs, and scanned documents are converted into structured .docx approval notes using Tesseract OCR. AI-generated code runs inside a network-isolated Docker container (--network none) to prevent unsafe external access.

Arduino-Based Joystick Controller

Key Skills: Arduino | Python | PySerial | PyDirectInput | Tkinter | Flask | Multithreading | Serial Communication

Project Link: https://github.com/shindesiddhant-415/Arduino-Python-Game-Controller

Built a custom PC game controller using an Arduino UNO that converts joystick and button inputs into keyboard commands through serial communication at 115200 baud. Developed a Tkinter-based Controller Hub for live input monitoring and a Flask-based phone remote interface for wireless control. Implemented dead-zone calibration and a multi-threaded architecture for smooth, real-time input handling.

AI-Powered Smart Crop Disease Detection

Key Skills: Python | Flask | React.js, | Node.js, | MongoDB | MobileNetV2 | Transfer Learning

Project Link: https://github.com/shindesiddhant-415/crop-disease-detection

Built an image-based crop disease classifier using transfer learning with MobileNetV2. Created a React frontend for uploading leaf images and viewing predictions, and connected a Flask model API to a Node.js backend with MongoDB for storing results.

ACHIEVEMENTS

- Solved 290+ problems on CodeChef
- 100+ on LeetCode
- Participated in 17 CodeChef Starters contests (highest rating: 1285)
- Scored 90% on the CodeChef C++ Skill Test

ASSESSMENTS / CERTIFICATIONS

Building & Deploying Applications with Google AI Studio

Provider: GUVI (HCL)

Key Skills: Google AI Studio | Generative AI | AI Application Deployment

Completed a course on building and deploying applications with Google AI Studio, conducted by GUVI (HCL) (27 Jan 2026). Certificate verifiable at guvi.in/certificate.

India AI Impact Buildathon (Certificate of Participation)

Provider: GUVI (HCL), at the India AI Impact Summit 2026

Key Skills: Artificial Intelligence | Problem Solving

Participated in the India AI Impact Buildathon (16 Feb 2026), a nationwide AI innovation challenge with 40,000+ participants, focused on AI-led problem solving for real-world challenges.

Adobe University Hackathon

Provider: Adobe

Key Skills: Teamwork | Problem Solving

Participated in the Adobe University Hackathon organised by Adobe (9 Aug 2026).

CO-CURRICULAR ACTIVITIES

- Participated in Smart India Hackathon (SIH) with an offline AI workbench for MRPL (Problem Statement 26117)
- Participated in the Adobe University Hackathon (Aug 2026)
- Participated in Amazon ML Challenge 2026, a national 72-hour machine learning hackathon (Sep 2026)
- Participated in the India AI Impact Buildathon (Feb 2026)

PERSONAL INTERESTS / HOBBIES

- Competitive programming
- Building hardware projects with Arduino
- Exploring AI tools and local LLMs
